- ☐ Ads and monetization (6)
- ☐ Content management (5)
- ☐ Business messaging (3)
- ☐ Others (5)

Some use cases can't be combined on the same app. Create another app if you need to add use cases that aren't combinable.

Create & manage ads with Marketing API
Create, manage and optimize ad campaigns across Meta technologies. Programmatically extend, stop or update ad campaigns and more. [About the Marketing API](#)

☐

Measure ad performance data with Marketing API
Maximize ROI with ad performance data to optimize ad budgets, creatives and create custom audiences, connect customers to product catalogs and improve reach. [About the Marketing API](#)

☐

Capture & manage ad leads with Marketing API
Give potential customers a quick and safe way to sign up to get info about your business or products. [About ad leads](#)

☐

Create & manage app ads with Meta Ads Manager
Promote your mobile app and drive installs. Create and manage campaigns that encourage users to download and install your app. Does not include access to Marketing API. [About app install ads](#)

☐

Access the Threads API
Use the Threads API and choose to authenticate users, retrieve user information, post threads, reply to threads, manage reply settings and/or gather insights for a Threads profile you own or manage on behalf of others. [About the Threads API](#)

☐

Launch a game on Facebook
Launch a game that players can find and play directly in their Feed or messages/conversations, on both desktop and mobile devices. [About launching a game on Facebook](#)

☐

Authenticate and request data from users with Facebook Login
Our most common use case. A secure, fast way for users to log into your app or game and for the app to ask for permissions to access their data to personalize their experience. [About Facebook Login](#)

☐

Advertise on your app with Meta Audience Network
Join Meta Audience Network to monetize your app and grow revenue with ads from Meta advertisers. Get insights using the Reporting API. [About Audience Network](#)

☐

Manage products with Catalog API
Manage catalogs and the products you want to promote across Meta technologies. [About the Catalog API](#)

☐

Allow users to transfer their data to other apps
Give users the ability to transfer their information from Meta apps to other services. [About data portability apps](#)

☐

Engage with customers on Messenger from Meta
Respond to messages sent to your business' Facebook Page. You can set up automatic replies or use a human agent to respond. [About Messenger Platform](#)

☐

Share or create fundraisers on Facebook and Instagram
Raise money and reach more people with Meta's Fundraiser API. Create or share existing fundraising campaigns on Facebook and Instagram. [About the Fundraiser API](#)

☐

Manage messaging & content on Instagram
Publish posts, share stories, respond to comments, answer direct messages and more with the Instagram API. [About the Instagram API](#)

☒

Access the Live Video API
Use the Live Video API for streaming live videos on Facebook. [About the Live Video API](#)

☐

Embed Facebook, Instagram and Threads content in other websites
Use the oEmbed API to embed Facebook, Instagram, and Threads content, such as photos and videos, in other websites. [About the oEmbed use case](#)

☐

Manage everything on your Page
Publish content and videos, moderate posts and comments from followers on your Page and get insights on engagement. [About the Pages API](#)

☐

Join ThreatExchange
Join ThreatExchange to share signals with other members about online threats, including terrorism, malware, CSAM, and other harmful content, to help keep people safe on the internet. [About ThreatExchange](#)

☐

Connect with customers through WhatsApp
Start a WhatsApp conversation, send notifications, create ads that click-to-WhatsApp and provide support. Business portfolio required. [About WhatsApp Business Platform](#)

☐

Create an app without a use case
Select this option if you'd like to get an app ID without adding any permissions, features or products.

☐

Looking for something else?

If you need a use case that isn't on the list, select an App Type and add the permissions and products you need.

Other This option is going away soon
Your app will be created in the old experience. Then, you'll choose from all available permissions, features and products.
